📍 Egypt

🧠 SKILLS

Technical skills

- CSS
- HTML
- Python
- Machine Learning
- Data Preprocessing
- Data Visualization
- Flask
- GitHub
- Google Colab
- Visual Studio Code

Soft Skills

- Collaboration
- Teamwork
- Communication
- Problem Solving
- Critical Thinking
- Time Management
- Creative Thinking

🌐 LANGUAGES

Arabic: Native

English: Intermediate

📜 CERTIFICATES

- CCNA: Introduction to Networks | Cisco Networking Academy – EELU (May 2026) [🔗](#)
- Computer Vision | Kaggle Learn (July 2026) [🔗](#)
- Intro to Deep Learning | Kaggle Learn (July 2026) [🔗](#)

📅 CAREER GOALS

To continuously develop myself and build deep expertise across Artificial Intelligence, staying up to date with emerging technologies while gaining practical experience and tackling real-world challenges. My ambition is to become a highly accomplished AI Engineer, contribute to innovative solutions, and establish myself as a leading professional in the field.

🎓 EDUCATION

The Egyptian E-Learning University (EELU),

Faculty of Computers and Information Technology

Relevant Coursework: Python, Object-Oriented Programming (OOP), Data Structures, Linear Algebra, Mathematics, Statistics, Probability, Machine Learning, Database Systems, Software Engineering, Operations Research, Web Development.

📁 PROJECTS

House Price Prediction Web Application [🔗](#)

- Built and deployed an end-to-end Machine Learning web application to accurately predict property prices using regression algorithms (Random Forest).
- Conducted Exploratory Data Analysis (EDA), feature engineering, and data cleaning (handling missing values and parsing unstructured string attributes).
- Developed a lightweight, high-performance RESTful API using **FastAPI**, **Uvicorn**, and **Pydantic** for fast model inference and validation.
- Designed an asynchronous modern web interface using **JavaScript (Fetch API)** and **CSS3** for real-time predictions .

Customer Churn Prediction Web Application [🔗](#)

- Developed an end-to-end machine learning web application using Scikit-Learn .
- Cleaned customer datasets, handled missing values, and applied feature scaling using StandardScaler to optimize classification model performance
- Built an interactive backend using Flask to load serialized .pkl models via joblib and process real-time input data.
- Designed a responsive frontend interface using HTML and CSS .

💼 PROFESSIONAL EXPERIENCE

AI Trainee | Information Technology Institute (ITI) (2026)

- Completed a training track on **Introduction to AI**, gaining a solid foundation in essential concepts and techniques.
- Covered essential mathematical foundations including **Linear Algebra** and **Probability** required for building and analyzing AI models.
- Performed end-to-end **Data Preparation** and exploratory data analysis (EDA) using **Python**, handling missing values, encoding categorical variables, and scaling features across real-world datasets.
- Applied fundamental **Machine Learning** algorithms and basic **Deep Learning** architectures through hands-on practice, evaluating model performance using key metrics to optimize overall accuracy.

👤 SUMMARY

Computer Science student specializing in Artificial Intelligence, highly organized and creative, with a strong passion for learning, growth, and working in the field of Artificial Intelligence. Excellent communication , teamwork skills and give my best effort to achieve high-quality results.
